## September 2018 StateofDorset Population Dorset County Council for the Dorset Council area

In this bulletin Dorset refers to the Dorset Council area coming into effect 1st April 2019 unless stated otherwise

Change in Dorset's demographic make-up can have an impact on service demands and provision but can also affect housing demand and business needs.

Changes in our population are shaped by both natural change (births and deaths) and by migration into and out of Dorset.

By projecting future population change, we can plan to target services and resources to the places where they will be needed most.

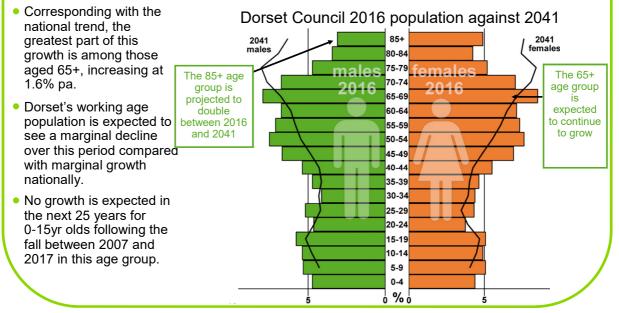

## Box 2: Age breakdown of population change

Over the period 2007-2017, the number aged 65+ grew by 22,500 – up by 27%.

- However, the population of working age dropped by 9,100 in Dorset and the number of children fell by 1,400.
- There was also a net loss of 15-19 year olds from Dorset to other parts of the UK, with net gains mostly among those aged 30+.
- Over the next 25 years, Dorset's population is projected to grow at a slower rate to the national average at about 0.3% per annum compared to 0.6%.

## What are we doing about it?

The council produces population projections which look forward 25 years and are revised on an annual basis. These projections can be used to anticipate local housing need and inform local plans which identify land for housing. The projections also help with school place planning - a growing population of children creates a demand for school places and support services. The ageing population can affect housing supply and demand by continuing to live in under-occupied homes, either from preference or because they require or requiring specially designed dwellings.

An ageing population has an impact on the economy as more employees move into retirement with a potential loss of skills from the workforce, unless employers up-skill other workers and train apprentices. The council works with partners to secure and deliver European Social Funds for initiatives to upskill the workforce and help people into employment. It also provides adult learning courses<sup>1</sup> and promotes the benefits of retaining and training older staff.<sup>2</sup> The Dorset Mentoring Scheme enables experienced business people to help fledgling companies by sharing their experience and mentoring through the early years.<sup>3</sup>

To support the growing number of older people, Dorset is helping people plan for their future care needs with a campaign: Prepare to Live Better. The council also provides advice and support to carers. Keeping fit and healthy into old age improves people's physical and mental wellbeing and reduces the demand for public services. Investing in green spaces and providing information through services like 'Live Well Dorset' can be much more cost effective than clinical interventions and other support.<sup>4</sup>
